

# Construction Newsletter 2018 Street Improvements

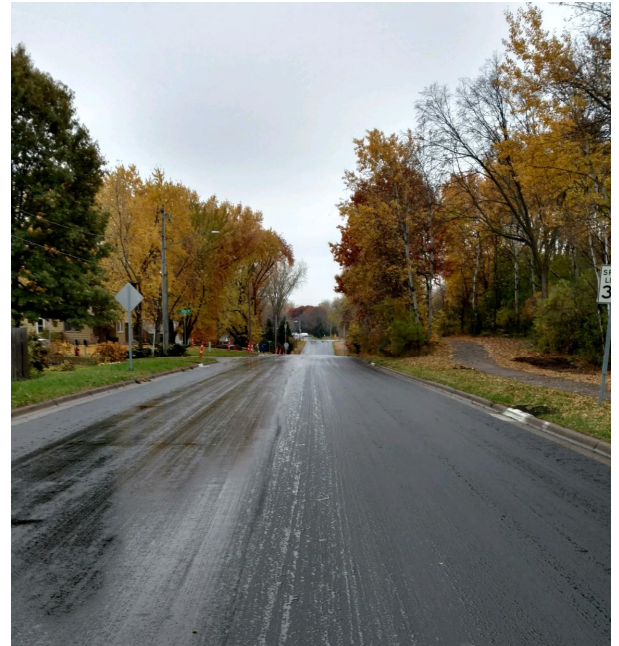

## PROJECT CONTACTS:

Property Owners with questions about the project should contact Lee Elfering, City Engineer, at (763) 780-0450 Ext. 3 or Lyle Splittstoser, Project Inspector, at 651-587-9209.

## Schedule

The Contractor spread topsoil this week and also paved the bituminous wear course on the street. The striping for the street is currently scheduled for Wednesday, October 31<sup>st</sup> but this date will be dependent on the weather. The Contractor has also indicated that sod would be installed next week, but an exact date has not been provided. With a little bit of luck the Contractor should be completed with this roadway by the end of next week.

## Restoration

Due to the late time of year that the sod is being installed the City will be inspecting the sod in the spring. Any sod that is dead will be replaced as part of the project before the contract is closed out with the Contractor.

## Other Items:

Please note that Lyle Splittstoser has returned and will be the project inspector the rest of the year. His number has been provided on the left side of this Newsletter along with the number for Lee Elfering.

## Caution around Construction Equipment

We want to remind you to use caution around the work site during the construction. Large and small construction equipment will be working in the area during the street improvements and it can be a powerful draw to curious children. Your assistance in reminding children to stay clear of construction equipment is helpful in maintaining a safe environment. Your patience and cooperation during this construction is appreciated.
